Robert Schalkenbach Foundation

RSF was organized in 1925 as a private operating foundation to promote public awareness of the social philosophy and economic reforms advocated by Henry George, including the "single tax on land values." To this end, RSF conducts research, holds seminars, and publishes and distributes articles and books, including Progress and Poverty (1879), George's best-selling original classic, as well as a new abridgement using the language of the 21st century. These and other works can be accessed from our online library. We also offer hard copy books for purchase from our online bookstore.

Henry George (September 2, 1839 – October 29, 1897) was an American writer, political economist, and social reformer. He was also the most influential proponent of replacing all taxes with a Land Value Tax, which became known around the world as the Single Tax. The “Georgist” philosophy and economic analysis begins with the premise that Land (all natural resources and urban sites), provided by nature and made valuable by society, belongs equally to all humanity, and that each person owns the products of his or her own Labor, mental and physical, that is necessarily applied to Land. George’s masterpiece, Progress and Poverty (1879), offers a reform program as the remedy for the poverty and economic depressions caused by land monopoly and speculation.

Main: www.schalkenbach.org

On RSF’s main website you can find our online Library of research papers by various contemporary scholars, as well as works by Henry George, which you download for free. You can also find there our online Bookstore with a hundred or so items available for purchase at reasonable prices -- including and in addition to the ones listed in our mini-catalogue.

Outreach: www.earthsharing.org

Earth Sharing is a non-partisan initiative of Robert Schalkenbach Foundation to promote the ideals of Henry George. We invite people to think and ask questions. What are the institutional causes of poverty? What can we do as a society to incentivize environmentally sustainable behavior? Why does it matter? What can I personally do to improve the situation?

**The Annotated Works of Henry George**

Series Edited by Francis K. Peddle and William S. Peirce

Henry George (1839 -1897) rose to fame as a social reformer and economist amidst the industrial and intellectual turbulence of the late nineteenth century. His best selling *Progress and Poverty* (1879) captures the ravages of privileged monopolies and the woes of industrialization in a language of eloquent indignation. His reform agenda resonates as powerfully today as it did in the Gilded Age. His impassioned prose and compelling thought inspired such diverse figures as Winston Churchill, Sun Yat-Sen, Leo Tolstoy, John Dewey, and Albert Einstein.

George starts from a great paradox: Why, with technology and national wealth rapidly advancing, do the vast majority live in poverty? His solution is to capture for public purposes the economic rent of land and other natural resources, a force that courses through the entire economy and, when privately appropriated, distorts economic activity, social arrangements, and political institutions.

This six volume edition of the works of Henry George assembles all his major works with new introductions to each volume, critical annotations, extensive bibliographical material, and comprehensive indexing to provide, for the first time, a comprehensive resource for scholars and reformers.

**Volume 3: Social Problems and Condition of Labor**

Coming June 2018

Edited by Francis K. Peddle and William S. Peirce - with Alexandra W. Lough

This is the first fully annotated edition of *Social Problems* (1883) and *The Condition of Labor* (1891), two important works by one of America’s most popular social economists. *Social Problems* grew out of a series of articles Henry George (1839–1897) published in Frank Leslie’s Illustrated Newspaper titled, “Problems of Our Times.” In his passionate, journalistic style, George described in graphic detail the horrific conditions facing large sections of the American people and how, by returning to first principles, society could remedy these conditions for current and future generations. *The Condition of Labor* takes the form of an open letter to Pope Leo XIII in response to the pontiff’s famous encyclical, *Rerum Novarum.* Echoing the religious themes dominant throughout all of his works, George argued that poverty is not part of God’s natural order and therefore, could be eradicated through political action. Both *Social Problems* and *The Condition of Labor* demonstrate George’s deep commitment to the reconciliation of ethics and economics in such a way that makes the world richer ethically and better off economically.

Rethinking the Economics of Land and Housing

By Josh Ryan-Collins, Toby Lloyd and Laurie Macfarlane
With a Foreword by John Muellbauer

Why are house prices in many advanced economies rising faster than incomes? Why isn’t land and location taught or seen as important in modern economics? What is the relationship between the financial system and land? In this accessible but provocative guide to the economics of land and housing, the authors reveal how many of the key challenges facing modern economies – including housing crises, financial instability and growing inequalities – are intimately tied to the land economy. Looking at the ways in which discussions of land are always excluded from both housing policy and economic theory, the authors show that in order to tackle these increasingly pressing issues a major rethink by both politicians and economists is required. A comprehensive, critical but accessible guide to the role of land in housing policy and how it has been dismissed from mainstream economic theory.

Reviews

“The book that did the most to alter my perception of the world.”
Bloomberg – Must-reads of 2017

“Analyses the subject with excellent clarity. Read it and you will understand the crucial underlying drivers of rising debt, increasing inequality and financial crises.”
Adair Turner, Chairman of the Institute of New Economic Thinking

“Lucid and convincing… Economics is evolving and this crucial book is a key part of its transformation.”
Danny Dorling, author of All That Is Solid: How the Great Housing Disaster Defines Our Times

“Takes a fresh and comprehensive look at the problems created by a failure to consider the role of land in the economy of the UK. It proposes a wide range of solutions which policymakers should consider.” Kate Barker, author of the Barker Review of UK Housing Supply

“A comprehensive survey of the role of land in the economy and its neglect in economics, as well as a profile of how ownership of this essential requirement for life has become unattainable for the majority of young Britons.”
Steve Keen, author of Debunking Economics

“Long overdue. It returns land to its central role in both economic theory and in built environment discourses.”
Duncan Bowie, author of Radical Solutions to the Housing Supply Crisis

More Than Two Sides: Abortion in Historical Perspective

Abortion has been a heated political debate for the past 40 years, generally treated as a binary choice of “pro-choice” or “pro-life”; this issue defies simplification. Castuera considers the diverse ways Jews and Christians dealt with this issue and shows that in earlier centuries, there were more nuanced ideas about it than today. Goode and Rothman discuss the perspective of African American midwives from the time of slavery until today. Dyer shows how Supreme Court decisions about abortion are skewed by politics such as the Dred Scott decision about the personhood of slaves were. Huber demonstrates the complexity of debates in France in the early 20th century.

Beyond Brexit: The Blueprint

by Fred Harrison & Mason Gaffney Ph.D.

The UK loses about 500bn pounds every year in wealth due to “bad” taxes. Across Europe, nations lose 1 trillion euros from VAT (value-added tax) alone, according to Mason Gaffney, professor emeritus of economics at the University of California. Governments create tax barriers to employment that drive people from their home settlements, creating the cross-continent migration that drove Britain to Brexit. The unique fiscal strategy discussed for rescuing the EU paves the way for European prosperity while also securing the UK’s freedom to trade.

Rent Unmasked

How to save the global economy and build a sustainable future

Essays in honour of Mason Gaffney

Edited by Fred Harrison

Thirteen authors influenced by Mason Gaffney explore a new economic paradigm that policy-makers need to solve global problems. They help expose how classical economics was debased to serve rent-seeking interests. It integrates concepts from macroeconomics with the common good to give strategies for reinvigorating global economy through a dynamic model that reinstates time and space.

Georgist Journal
Edited by Lindy Davies

For more than four decades the Georgist Journal has been the publication of record for the Georgist movement. It reports on events and also features the most recent writings by prominent Georgist advocates and activists.

Originally edited by Bob Clancy and published by the International Union for Land Value Taxation, it also became the organ of the Henry George Institute, and later on was adopted by the Council of Georgist Organizations.

In 2016 Robert Schalkenbach Foundation joined with HGI to serve as co-publisher of the Georgist Journal.

The Monopolists
Obsession, Fury, and the Scandal Behind the World’s Favorite Board Game
By Mary Pilon

Pilon tells the true story of how America’s favorite game about money came to be. Rooted in the Quakers, a feminist named Lizzie Magie created the “Landlord’s Game”, generations before the Parker Brother sold their version. Her game- an antithesis to its cultural significance and economic morals- has captivated minds throughout time. The Monopolists reads like a script from a noir film, told through Monopoly’s real-life winners and losers.

Perfect Timing
by Jeffery J. Smith

Transported to the future by chance, Crik escapes house-arrest with Tepper, who might be his descendant. While pursued by a vigilante, Crik explores and seeks clues in Geotopia- a world where buildings grow, people incorporate animal powers, smart phones know it all, and vehicles defy gravity. Can he discover, understand, and articulate the future’s public policy that works right for everybody, and prove he is the founder.

2017 Rogue Phoenix Press RSF $12
Mason Gaffney 

Mason Gaffney born 1923, is an American economist and major critic of Neoclassical economics. He earned his B.A. in 1948 from Reed College in Portland, Oregon. Gaffney first read Henry George’s masterwork Progress and Poverty as a high school junior. After serving in World War II, this interest led him in 1955 to get a Ph.D. in Economics at the University of California, Berkeley, with a dissertation on “Land Speculation as an Obstacle to Ideal Allocation of Land.” Gaffney became Professor of Economics at the University of California, Riverside, in 1976.

The Mason Gaffney Reader

One of Mason Gaffney’s worthiest contributions in recent years has been to make his lifetime of groundbreaking economic analysis accessible to the public in a series of essays. In this work, Gaffney tackles tough questions, from the reconciliation of economics and environmentalism, to the challenges of postcolonial development in the Philippines and post-Katrina rebuilding in New Orleans.

Economic Justice & Public Policy

The Self-Supporting City
By Gilbert Tucker

Henry George wrote in Progress and Poverty (1879) that socially created “ground rent,” or annual land value, could finance public services, replacing all other taxes. Tucker expanded and elaborated this claim in 1946, before the academy recognized its powerful validity. In the 1970s, Nobel Laureates William Vickrey and Joseph Stiglitz, added this idea to the economic canon as “the Henry George Theorem.”

Explores the roots of the question of how we should “manage” natural resources. Rather than just a series of linear arguments, it is also an anthology that presents, analyzes and compares the views of Libertarian greats throughout history. Author Harold Kyriazi

Two Views of Social Justice
**A Catholic/Georgist Dialogue**
Edited by Kenneth R. Lord
Sixteen scholars came together at the University of Scranton to examine eight social-justice themes – natural law, human nature, the nature of work, the nineteenth-century papal encyclical *Rerum Novarum*, causes of war, immigration, development, and neighborhood revitalization.

Henry George

Social Problems

In this collection of twenty-two dynamic essays on many issues still vital today, George includes a prophesy that the closing of the American frontier will lead to housing and job shortages, the rise of supranational corporations, agribusiness, and pollution.

1883, 1996 RSF  RSF Price: $20

The Land Question

Henry George was one of the most influential political economists of his time. This book presents three important classics in one volume: *The Condition of Labor*, along with George’s tract on the land question in Ireland, and his famous dialogue with the Duke of Argyll. This new edition provides unified pagination and a comprehensive index.

ISBN: 978-0-91131-240-9 PB 328 pp
1893, 2009 RSF RSF $15

Protection or Free Trade

An Examination of the Tariff Question, with Special Regard to the Interests of Labor

“Looks past protectionist canards to show how the holders of land and other privileges are the ultimate beneficiaries of trade protection. This classic “remains a wonderful introduction to economics.”

— Tyler Cowen

1886, 1991, RSF RSF $25

A Perplexed Philosopher

An Examination of Herbert Spencer’s Utterances on the Land Question

A critique of Spencer’s later Social Darwinism, in contrast to his early defense of equal liberty found in *Social Statics* (also for sale, see page).

1892, 1988 RSF  RSF HC: $20 PB: $12

Economic Justice & Public Policy

Ownership

Early Christian Teaching

By Charles Avila

Avila proclaims that early Christian social doctrines can shed light on issues as old as time, including wealth and poverty. Pulling from early thinkers in Christianity, the author wants truth to be known.

A New Model of the Economy

By Brian Hodgkinson

A radical revision of modern economic theory, this analysis adjusts the entire range of economic thought in relation to the significant parts played by land, credit, the banking system and methods of taxation. Based upon natural law, economic security for all, fair distribution of output, and the opportunity for self-fulfillment, this work highlights important concepts often omitted from current studies.

Eradicating Ecocide – 2nd Edition
Laws and Governance to Stop the Destruction of the Planet
By Polly Higgins
Polly Higgins demonstrates necessary and pragmatic solutions to how our planet is being destroyed by the activities of corporations and governments, facilitated by ‘compromise’ laws that offer insufficient deterrence. Higgins examines the power of law to make long-lasting change by providing a historical timeline to how law has succeeded in curbing the power of governments, corporations and banks for the greater good. It’s based on the principle of ‘first do no harm’ that can be applied on any scale and used by anyone involved in decision-making.

2016 Shepheard-Walwyn List $24.95  RSF $15

America is Not Broke!
Four Multi-Trillion Dollar Paths to a Thriving America
By Scott Baker
The unsustainability of the American economy is as familiar as the news cycle. There is no money for social programs, to run the government, or to cut taxes. News syndicates are constantly complaining about the national debt or figuring how to slice an already shrinking economic pie differently. The fact is that we already have all the wealth we could ever need. The tried and proven proposals in America is Not Broke would guarantee its prosperity, fairness, democracy, and economic and ecological sustainability.

2015, Tayen Lane Publishing List $29.99  RSF $25

Land
A New Paradigm for a Thriving World
By Martin Adams
Land has been sought after throughout history. Even today, people struggle to get onto the property ladder; most view real estate as an important way to build wealth. Yet, the act of owning land—and our urge to profit from it—causes grave problems. The book introduces a new economic model, one that promises a sustainable and abundant world for all. It is for those who dream of a better world for themselves and future generations.

Protection or Free Trade
Abridged Edition of Henry George’s Classic
Abridged by F. C. Douglas, with a new Afterword by Adele Wick on “Trade, Economics and the Cultural Narrative.” True free trade includes the abolition of land monopoly and the equitable redistribution of its market value.
2008  RSF  RSF $10

The Science of Political Economy
Abridged Edition of Henry George’s Classic
Abridged by Lindy Davis with a new introduction by Harry Pollard. Afterword on what “Henry George’s last work extends on the nature of wealth and value, cooperation and exchange, space and time. George ‘Left Out’” by Lindy Davies.
2004  RSF  RSF $10

Our Land and Land Policy
Edited by Kenneth C. Wenzler
This is Henry George’s first major work that was curated and includes a prefatory note from Henry George Jr. It’s a collection of speeches, lectures and miscellaneous writings, that show Goerge’s disdain for land monopolization and speculation by the elite.
1999 Michigan State University  List $22.95  RSF $16
**The Prosperity Paradox**

*The Economic Wisdom of Henry George Rediscovered*

Foreword, edited, by Dr. Mark Hassed

Ten short works including, “Scotland and Scotsmen,” and “Land and Taxation.” The chapters are broken up into short sections, making this book an excellent introduction to Henry George in his own words.

2000 Chatsworth Village  RSF $16

**Henry George**

By Charles Albro Barker

This definitive biography, first published in 1955 by Oxford University Press, approaches its subject from a critical historical and sociological perspective. It reveals George’s importance to social reform in the US and UK.

1991 (orig. 1955) RSF RSF $10

**The Economics of Henry George**

*History’s Rehabilitation of America’s Greatest Early Economist*

By Phillip J. Bryson

Many modern economists have analyzed the work of Henry George at length. While much specialized literature on many specific facets and aspects of his work exist, Bryson provides an overview of George’s economics and of this historic rehabilitation.

2011 Palgrave Macmillan List $95 RSF $65

**Progress and Poverty: For Our Time**

By Henry George, edited and with additional material by Carl Shaw

The editor has added several features to make Progress and Poverty fit for the modern day with features such as questions at the end of chapters to help readers think about the content of that chapter as well as pictures, graphs, and charts to help visualize key concepts.

**Economic Justice & Public Policy**

**Our Land, Our Rent, Our Jobs**

*Uncovering the Explosive Potential for Growth via Resource Rentals*

By Stephen Meintjes & Michael Jacques

Foreword by Nobantu Mbeki

South Africa’s growth potential is unleashed from the authors’ reform in a way that benefits investors and the poorest by reforming taxation. To achieve this, most taxes would be replaced with land value rentals. A tax formula on mining and infrastructure investment would stimulate growth and job creation, and land values will rise.

2015, Shepheard-Walwyn Ltd  List $32.96  RSF $20

**No Debt, High Growth, Low Tax**

*Hong Kong’s Economic Miracle Explained*

By Andrew Purves

Two small islands with no natural resources seem to enjoy high growth and low taxation: Hong Kong and Singapore. In Hong Kong, the government owns the land, which is available for rent. Singapore controls more than half its land area and has large stakes in industry. Purves suggests a model for creating public revenue to allow this shift in taxation from production to the economic rent of land.

2015, Shepheard-Walwyn Ltd  List $23.95  RSF $15

**Nature’s Gifts**

*The Australian Lectures of Henry George on the Ownership of Land and Other Natural Resources*

By: John Pullen

In 1890, Henry George arrived in Australia to begin a controversial 98-day public lecture tour visiting 34 cities and towns. Following the international publicity generated by Progress and Poverty and its challenges to conventional economics, he had made several lecture tours in Britain, attracting immense audiences. In Australia, he continued to promulgate vigorously and eloquently his program for the ownership, management and taxation of natural resources such as land, coal, and minerals.
